- Efficient CIP systems c/w electrical PLC control panel designed for each model ensure high quality cleaning
- Using Blackwater's "Positive Steering system" you can achieve maximum capacity and increased maneuverability on narrow country roads.
- Approved for vehicle plating: WNI / VIN VN9/006

Supplying Road tankers for over 30 years.

From 1972 to 1985 Blackwater supplied large quantities of aluminum, carbon steel and stainless steel tankers to the petroleum industry, supplying customers including Burmah, Conoco, Esso, and Texaco. Since 1985 we have concentrated exclusively on stainless steel production.

We are convinced that our stainless steel oil tankers c/w "positive steering" will provide you with the ideal solution for your petroleum transportation needs.
