

Blackwater Vessels & Systems

Our High Performance Vessels will Maximise you Returns.

For over 35 years Blackwater Engineering is recognised as a leading supplier of specialised stainless steel storage and process vessels and systems to the food, dairy, chemical, pharmaceutical, brewing and beverage industries in Ireland and the UK.

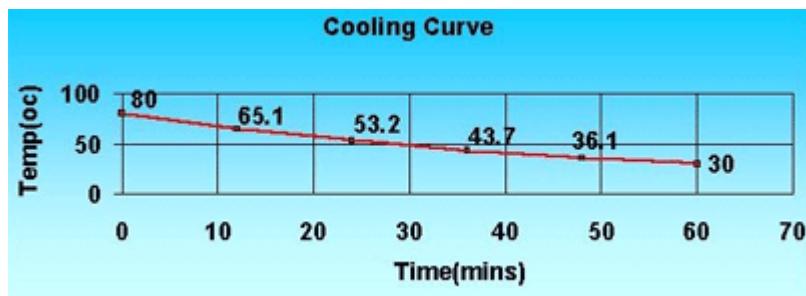

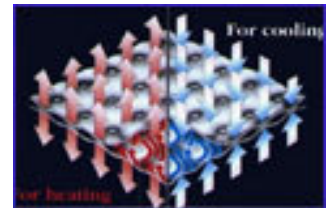

What Blackwater can Offer You ?

- Vessels and Silos c/w heating / cooling / agitation / and instrumentation to 300,000L are delivered to site fully insulated
- Site erected tanks to 500,000L
- Bulk Solids Handling incl. Powder & sugar handling and vacuum conveying systems
- Blackwater Thermal plate for Heating and Cooling, Agitation and CIP improves the performance of your vessels

Thermal Plate Technology

Efficient Economical & Energy saving for Heating and Cooling. Thermal plate vessels guarantee the quality of your products as they maintain the vessel content at a constant temperature. In house software calculates the heating and cooling gradient for your process.
